# sella

Multifunctional Chair

# Multifunctionality, mobility and mobilization

sella – the solution for diverse areas in clinic and nursing care

Patients and residents are often very limited in their mobility. The reasons for this situation are manifold, such as prolonged illness – combined with a stay in hospital or advanced age. In many cases, the consequences are reduced strength and limited mobility, which can often lead to an insecure gait with an associated risk of falling.

With early mobilization attempts and movement-enhancing measures in the clinic and nursing care, independence and self-activity shall be promoted, but also consequential damage – such as increasing immobility with the risk of contractures and decubital ulcers – shall be significantly reduced. A first step towards promoting mobility may entail a transfer from a hospital/care bed to an adequate multifunctional chair.

The sella multifunctional chair is equipped with functions that promote mobility and mobilization and provide optimum support for both patients/home residents and caregivers in terms of safety, ergonomics and comfort. In addition, sella's excellent driving characteristics make it ideally suited for a wide range of transport/transfer situations within the hospital and/or care facility.

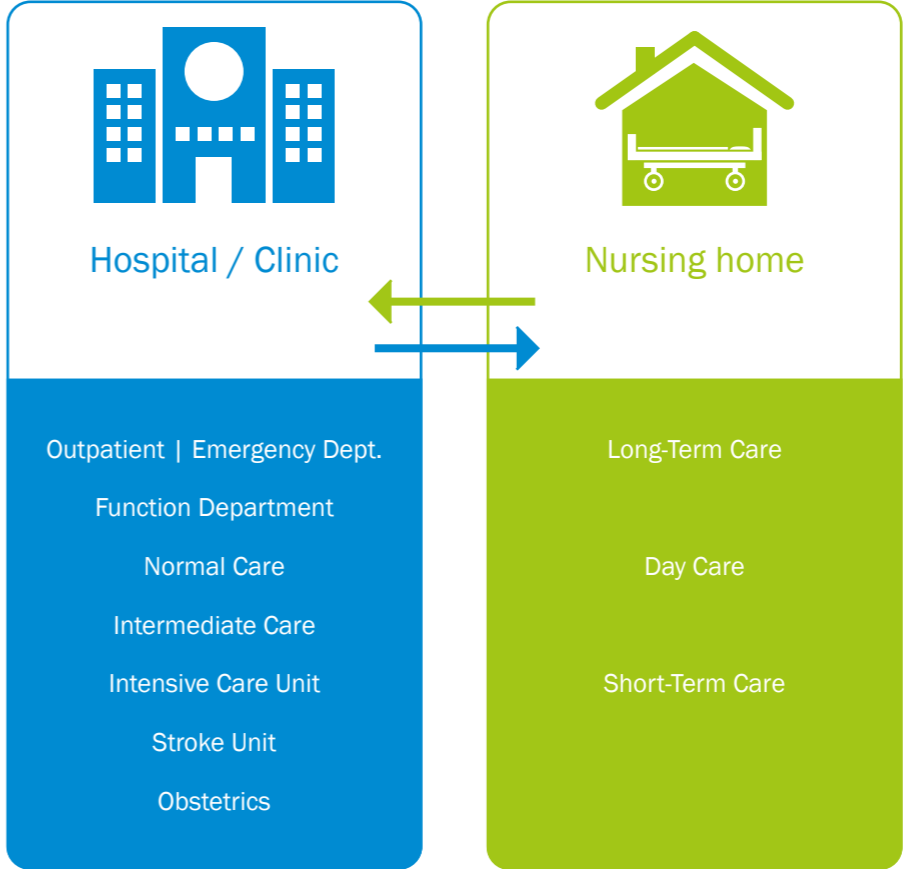

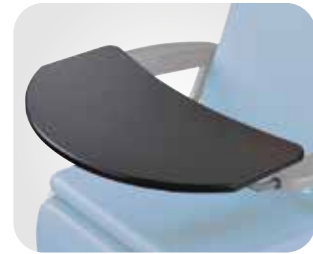

Illustration (also cover) may differ from the delivered product.

# Flexibility as needed and application

## Safety

- Comfortable, safe entry and exit height - fall prevention
- Passive and active safety elements: side guards, armrests, pillows, storage table, central brake and foot pedal
- Positioning as required: sitting, lying and resting

Flexible table - strengthening the seating position and promoting independence and self-reliance

Side protection, padded - safe sitting and lying comfort

## Workflow Optimization

- Mobility and mobilization in one product
- Extensive accessories for clinic and care
- Support of mobilization steps under ergonomic aspects - lifting hydraulics for height and inclination of the seat

Comfortable resting and sleeping positioning or support with transfer- or examination situations

Lifting hydraulics for height adjustment with seat inclination for a safe entry and exit of the patient as well as back-friendly care support.

## Process Optimization

- Flexible areas of application in clinics and nursing homes
  - Extensive model variants for indoor and outdoor use
  - Easy and safe maneuvering in different environments

Outdoor: Maximum comfort for long distances or for uneven surfaces thanks to large casters

Indoor: Safe and easy maneuvering in the smallest space thanks to small castors at the front

## Hygiene

- Removable, antimicrobial upholstery
- Infection control through easy-to-clean surfaces
- Easy removal of the seat upholstery

Infection control through easy cleaning of the upholstery elements

# Portfolio

<b>Operation area</b>	Outdoor  	Indoor  
<b>Modell</b>	 SLA-AX Fixed carriage with big front castors	 SLA-DX Lift carriage with rotating front castors
<b>Drivability</b>	2 big front castors – for outdoor transfer	4 small castors – for the optimal use in small rooms
<b>Maximum patient weight</b>	150 kg	150 kg
<b>Dimensions</b>	Length in basic position	910 mm
	Length in lying position	1610 mm
	Width	685/705 mm*
	Maximum lift (of height adjustment)	205 mm
	Minimum height	490–505 mm**
	Maximal height	490–745 mm**
	Back rest adjustment angle	12° bis 70°
	Footrest adjustment angle	12° bis 87°
	Arm rest adjustment angle	-25°, 0°, 25°, 90°

## Colour options standard

(Accurate colouring is only possible by means of decorative samples.)

Baltic (008278)  
Synthetic leather

Apricot (008294)  
Synthetic leather

Creme (008291)  
Synthetic leather

Pink (8048)  
Fabric

Perweiß (6017)  
Fabric

## Special colours

Other colours are available for an additional charge. (Exact colouring is only possible with decor samples).

The following special colours are shown in the brochure:
